Project Experience

eTaxi (Android App)

Inspired from the famous Uber app I have developed an eTaxi App which can be used to provide transportation when need. User can register and get a taxi on demand using the GPS sensor of their cellphone. There are two different views for driver and customer.

Role: Developer

Responsibilities

- Analysis of the whole Idea
- Engineered project's idea from start to completion; devised innovative operating procedures and processes contributed to productivity and profitability.
- JSON for providing with HTTP functionalities
- Tested in different types of Models with different sizes.
- Created the whole app from start to finish.

Languages: JAVA, XML

Tools: Android Studio, Parse Dashboard, Heroku

2in1Game (Android App)

This app has basically 2 Apps combined in it. Based on your need you can play Flappy Bird or XOXO game. XOXO game is the two player game with an autobot option if you need to play it alone. Based on the options if you want to play FlappyBird it can be chosen, which itself is a part of the app.

Role: Developer

Responsibilities

- Analysis of the whole Idea
- Engineered project's idea from start to completion; devised innovative operating procedures and processes contributed to productivity and profitability.
- Created Sprites using GIMP and used GDX as the base
- Tested in different types of Models with different sizes.
- Created the whole app from start to finish.

Languages: JAVA, XML

Tools: Android Studio, GDX

Livetrack (Windows App for SIDELOADING)

Livetrack is a Windows Application capable of tracking real time location of a cell using GPS. This application constantly reviews the changes made in the location and keeps posting the updated information to the server which is then received by another device to show the current location.

Role: Developer
